

# Foresight BI E-Learning Enrollment Report

27	1,236	21	46%
No. of Courses	Total Number of Users	Ave. Course Duration (hrs)	Course Completion Rate

Course enrollments showed that Online Self paced course type had the most enrollments as can be seen on the monthly charts, most users enrolled for the Introduction to Power BI course more at the beginning of the year - January

## Course Enrollment Trend

## Enrollment by Course Type

Online test course types showed higher completion rates than other course types, its not a case of preference but rather the course type which as the name implies is just a test and once taken, a 100% completion rate is achieved, same applies for the online survey course type. However, between the more detailed course types, Online Live showed higher completion rate than the online self paced, which can be related to user behavior and not entirely on the course duration.

## Course Type Completion Rate

## Course Duration vs Course Completion Rate

## Quiz Score % by Quiz Name

Check your knowledge - Intro to Power BI	84.6%
Week 4 Quiz - Power BI Bootcamp 6	81.7%
Data Prep + Data Profiling Quiz - Power BI Bootcamp 6	81.1%

Check your knowledge - Introduction to Power BI	79.7%
Transform Data Quiz (wk 2) - Power BI Bootcamp 9	76.0%
Transform Data Quiz (wk 2) - Power BI Bootcamp 6	75.2%
Data Prep + Data Profiling Quiz - Power BI Bootcamp 7	70.2%
Data Prep + Data Profiling Quiz - Power BI Bootcamp 9	70.2%
Check your knowledge - Data Analytics Essentials with Power BI	67.5%

## Recommendations

- Marketing should be focused on online self paced course types as courses in this course type had more user enrollments and engagement but lower course completion rate. To improve user experience on this course types, user reviews, feedbacks and ratings at the end of each section the course should be retrieved in order to understand the low completion rate and improve on it.
- To understand the high enrollment rates at the first quarter of the year, if related to promotion sales at the beginning of the year, such promotions should be replicated at least twice in the year to increase user enrollments and course sales all through the year. These campaigns should be targeted at the vital few using the 80/20 principle.

Course Enrollments by Year

Course Name	2020	2021	2022	Total
Introduction to Power BI	289	230	290	809
